About Essex Highways

Essex Highways is a strategic partnership between Essex County Council, the highway and transport authority in Essex, and Ringway Jacobs, the integrated highways service provider delivering maintenance and infrastructure works across the county.

Essex Highways is delivering and enabling Safer, Greener and Healthier travel for current and future users of the transport network in Essex.

FAQ on highway and footway maintenance and repairs

How can I report a pothole?

If a resident is reaching out to you about a defect on a road or footpath, there are a number of routes through which it can be reported.

1. It is really important that you encourage the resident to report the defect themselves. They can use the report it tool on the Essex Highways website (www.essexhighways.org), which allows you to report a pothole or other issue on either a road or footpath. The location can be pinpointed on a map, where you can also see if it's already been reported before the complaint is submitted. You'll receive a defect number and can use this to track your complaint through the 'track it' service on the website.
2. If you believe your issue is dangerous but not being progressed you can speak with your County Council Member as if it is obviously dangerous they may also refer defects to the ECC Members Enquiries service, who will log the issue.
3. For the year 2022/23 County council members are given an allocation of funding each year to repair defects in their division. These issues are given priority status and allow members to get up to 36 defects (split into two tranches of 18) repaired for the current year.

How long does it take to repair a pothole?

Essex Highways has a system of prioritising defects on highways and footways. An inspector will aim to assess the site and if the site is deemed unsafe, it will be classed as high priority and a team will visit the site to make it safe. The team are then likely to return following the winter months to provide a fuller repair.

I reported a pothole weeks / months ago and it's not been repaired, why?

There are a number of factors that could have prevented the reported defect from being repaired. Firstly, the issue may not have met the criteria for needing a repair, i.e it's not deemed to be unsafe to road and footway users. Secondly, weather conditions, particularly during winter, will prevent teams from being able to visit a site.

How much does it cost to fix a pothole?

Essex Highways cannot estimate the cost of repairing a single pothole because of a number of factors. These include the bulk purchase of materials, which provides savings to the surface, and materials being used to repair more than one defect in a single location.

What do orange squares around a pothole mean?

The orange lines drawn around a defect on a road are there to show that we have identified the defect as one that needs fixing, and as a visual aid to our operatives so they are clear which defect on the roads or footpaths they are fixing.

Why do multiple teams come out over several months to fix the same defect, why can't it be fixed the first time?

During the winter months, Essex Highways will do a 'make safe' repair on a defect – designed to make the area safe to drivers and pedestrians in the short term, before the team returns when conditions are improved to carry out a full repair. A 'make safe' can be carried out with minimal disruption to users of the road or footpath, so prevents disrupting journeys and access in the short term.

Can Essex Highways and utility companies work together so the roads are only dug up once?

We work extremely hard to co-ordinate all roadworks taking place on our network. However, emergency situations like burst water mains do occur and when they happen, utility companies do not need to apply for permits like they ordinarily would for planned works. Instead, they just need to ensure that we are informed of the works within two hours of them starting.

There are defective street lights in my area, how do I report them?

Issues with streetlights can be reported using the same 'tell us' tool as road defects on the Essex Highways website. However, the new LED streetlights being installed across the county do have sensors which report issues into a central system, which means if there is a fault with a new street light, the Essex Highways team will be aware of it and taking action.

What defects would Essex Highways repair?

Essex Highways will repair defects like the following pictures, classifying them as high risk.

Essex Highways would not repair defects like those in the following pictures, deeming them low risk.

How can you stay up to date?

There are a number of ways Members can stay up to date with works that are taking place in districts across the county and the updates the Essex Highways communications team is putting out daily.

Follow us on social media:

- Essex Highways Facebook page launched recently and has regular updates on works being carried out across the county and educational content on the work of Essex Highways: [Essex Highways | Facebook](#)
- Essex Highways Twitter page has daily updates on work taking place, information about road closures and a range of infographic, photo and video content. The page also amplifies posts from partners such as National Highways, Safer Essex Road Partnership and ECC to ensure followers get the latest information on what's happening across the roads in Essex: @essexhighways

Content for Members

- At the beginning of each month you will have started to receive a monthly report which lists all the planned works scheduled to take place in your districts. This gives you a view of where Essex Highways crews will be working in your areas and they types of works taking place. Dates are subject to change, but the report gives you all the info you should need to keep you updated on what's happening in your districts.
- Members can also sign up for more tailored updates on works taking place in your districts through the Future Roadworks page on the Essex highways website: [Future Roadworks Map | Essex County Council \(essexhighways.org\)](#). On the map, click the envelope / email icon:

...and you'll be asked to either login if you already have a one.network account, or to register. Here you'll then be able to choose the area you want updates on and the frequency (daily, weekly, monthly etc).
